

the B.A. and B.S. with Environmental Ethics and Environmental Policy Analysis courses. Courses in Biology; Earth and Environmental Sciences, Environmental Studies; Management, Business, and Economics; Mathematics; and Study Away constitute the major requirements for each degree.

INTERNSHIPS/RESEARCH

A career as a sustainability manager requires an individual to be very comfortable with public speaking as well as interpersonal communication. A manager of any sort, especially a sustainability manager, must also have the necessary leadership skills to effectively supervise and guide a multitude of staff and stakeholders. Such skills sharpen through internships as well as conducting research. (s) 5 01(-592) 113 5ud 7y) o 20n) 2st 24jd) 520 7 ot(d s) 21 p) 1(a) agtm 63.31 a) 3er) 2 each degree.)
